

# Diagram Heart Hospital will Collaborate with UPN Veteran Jakarta

Thursday, 23 January 2020 16:17 WIB

**HumasUPNVJ** - Thursday (23/01/20) Director of Diagram Heart Hospital visited UPN Veteran Jakarta in order to explore cooperation which will be carried out by both parties.

The meeting with the UPNVJ Chancellor was held in the Archipelago 1 meeting room, UPNVJ Pondok Labu Campus. The existence of this meeting is the initial stage of the collaboration process that will be carried out.

On the occasion when interviewed by dr. Hoyi Siantoresmi, MARS as the director of Diagram Heart Hospital conveyed several main reasons for choosing UPNVJ to collaborate.

"The main reason we see is the credibility of the UPNVJ university which has been around for a long time with many graduates. Our medical staff are also graduates from UPNVJ. So we see that this university is qualified enough to be able to collaborate. The location is quite close to our hospital so if you are undergoing an accommodation program it will be easier because later our staff will help the university. We have quite good medical staff and we want to contribute by imparting knowledge to medical and nursing students. The aim is that with this collaboration we will contribute to the world of education," he said.

With this assessment, UPN Veteran Jakarta hopes that in the future good collaboration will be established and increase the number of collaborations carried out and increase the quality of the teaching provided.
