

Inauguration of LAB OSCE CENTER Faculty of Medicine UPN "Veteran" Jakarta

Friday, 10 October 2014 12:40 WIB

Thursday, October 9 2014 which took place at Gd. Abd. Rachman Saleh Lt. 4 the inauguration of the OSCE (Objective Structure Clinical Examination) Center Lab was held. The event which started at 12.00 was attended by the Rector, Vice Chancellors, Deans and other invited guests.

In his remarks, the Chancellor expressed his gratitude because this Lab had been inaugurated as a facility for Medical Faculty students in the learning process while they were students at UPNVJ. The hope after this Lab was inaugurated is that the accreditation from the Faculty of Medicine must go up and not down. Apart from that, it is also hoped that the "birth" of prospective doctors and the "birth" of Military Medicine who are highly dedicated and able to serve the community will be graduate students from UPNVJ.

On this occasion, the Deputy Dean I of the Faculty of Medicine conveyed a message from the Dean of the Faculty of Medicine who was unable to attend that the OSCE Center Lab "must" be owned by every Faculty of Medicine at a university, because Medical Faculty students must carry out a Comprehensive Test in this OSCE Lab. Thank you for inaugurating the OSCE Lab so that students can complete their exams on time. For now, what we can say is that all supporting facilities can be fulfilled immediately.
