

UPNVJ Synergy, Polres Metro Depok and LPS in the Freedom Vaccination Movement

Tuesday, 14 September 2021 09:13 WIB

UPN veteran Jakarta together with the Depok Metro Police and the Deposit Insurance Agency (LPS) held an independent vaccination activity for all levels of society, at the Cinere Fresh Market, Saturday (14/9/21). This activity lasted for approximately 1 full month. In this independent vaccination activity, it is targeted to have 200 participants per day. This activity was also supported by SATPAS SIM 1221 Satlantas Polres Metro Depok.

Meanwhile, the head of the education and public services division, Romy Diputra, said that LPS was participating in this donation so that the vaccine was accelerated, with the target of 22 million doses per day.

"This activity is very good, go straight to the community center. So residents while shopping can get vaccinations for free, whether it's the first or second vaccine," said Romy. According to Romy, currently people are information literate and afraid of hoaxes, as we have heard a lot, later after being injected they can get a fever or get sick, even though This information is no longer trusted by the public.

Kasubnit Satpas Auxiliary 1221 Cinere, Satlantas Polres Metro Depok, Iptu Toni also said, this activity was one of the programs delivered by the Head of Police, namely the Covid 19 Vaccination health program.

"Tell this to the people of both Cinere and all the people out there, get a vaccine immediately, don't be afraid and be able to come to our outlet," Toni said.

He also said that vaccination is the key to building community resilience, alias herd immunity, so that Indonesia will be strong and Indonesia will grow," he said.

During the implementation of the vaccination, the Head of the Cinere 1221 Sub Unit Unit also asked all participants to continue implementing health protocols to restrain the rate of transmission and reduce the risk of exposure to the COVID-19 virus.

Likewise, what was conveyed by the doctor in charge of the vaccinator, Reza Febiardi, was the implementation of the vaccine at the Cinere Satpas, with a total of 150 Sinovac first and second doses.

Reza said the recipients of the vaccine ranged in age from 12 to 60 years, which we provide with a record of being physically and mentally healthy.

However, the obstacle we face here is that the public lacks information about vaccine schedules. most of them know themselves about the place of time.

"The public's enthusiasm is getting better and more and more are aware that they really need to be vaccinated, and the success of this government program," said Reza.
