HumasUPNVJ - Pharmacy Study Program Undergraduate Program of the Faculty of Medicine, National Development University "Veteran" Jakarta (UPNVJ) has been accredited "Very Good" based on the Decree (SK) of the Management Association of the Association of Indonesian Health Higher Education Independent Accreditation Institutions (Association of LAM PT-Kes) Nomon 0304/ LAM-PTKes/Akr/Sar/IV/2023.

This is an extraordinary achievement for the UPNVJ FK Pharmacy Study Program which is a new study program after going through the entire process of preparation, maturation to field visits by obtaining the "Very Good" accreditation status.

"Very Good accreditation shows progress in the Bachelor of Pharmacy Study Program. It also shows that the Bachelor of Pharmacy Study Program is competitive with similar study programs elsewhere," said the Dean of the Faculty of Medicine Dr.dr.Taufiq F Pasiak, M.Kes., M.Pd.I.

He hopes that this achievement will be a good momentum to be able to continue to process and develop positively and to become an example for all new study programs in the UPNVJ environment.

"This year there will be the first graduates of the undergraduate pharmacy study program. These graduates will be a motivation to increase accreditation to excellence which will later facilitate the establishment of professional pharmacist education at UPN Faculty of Medicine," said Taufiq.

Still regarding accreditation, Industrial Engineering which is part of the Faculty of Engineering UPNVJ managed to achieve "Excellent" accreditation from LAM Engineering.

The superior accreditation given by LAM Engineering shows that the Industrial Engineering Study Program meets high standards of quality education and is in line with the demands of the industrial world. The accreditation process carried out by LAM Engineering includes a comprehensive assessment of study programs, lecturers, facilities, curriculum, and education management.
