

# UPNVJ PPDS Achieves Excellence at the 2025 Malaysian Radiology Congress

Thursday, 02 October 2025 16:40 WIB

**Public Relations of UPNVJ** - The Radiology Specialist Doctor Education Program (PPDS) of the Faculty of Medicine, Universitas Pembangunan Nasional "Veteran" Jakarta (UPNVJ) achieved success at the Malaysian Congress of Radiology (MCOR) 2025. Dr. Muhammad Ibnu Khaldun was selected as one of the Top 100 Abstracts recipients through an e-poster presentation entitled "Aggressive Femoral Osteosarcoma With Early Pulmonary Metastasis In A 24 Years Old Female: A Case Report". The event themed "Batik Network: Integrating Multidisciplinary Collaboration Into Radiology Practice" was held September 19-21, 2025 at the Sunway Resort Hotel, Sunway City, Malaysia.

This annual congress, organized by the College of Radiology, Academy of Medicine of Malaysia, and the Malaysian Society of Radiologists, provides a platform for radiologists and students to share experiences and foster multidisciplinary collaboration. Khaldun's abstract will be published in the Asian Journal of Medical Technology (AJMedTech), an open-access journal focused on medical technology innovation.

The case presented concerns aggressive femoral osteosarcoma with early pulmonary metastases in a 24-year-old woman. Osteosarcoma is the most common primary bone cancer in adolescents and young adults, with pulmonary metastases rates reaching 15-20 percent at initial diagnosis, according to data from the National Cancer Institute.

The UPNVJ Radiology PPDS delegation consisted of Dr. Bintang Bayu Aryandi, Dr. Muhammad Ibnu Khaldun, Dr. Muhammad Dainulmu'akhir Farid, and Dr. Datu Andra Sarvatra Damadika Sampetoding. They were accompanied by Dr. M. Irvanie Rama Harahap, Sp.Rad, and Dr. Samuel Tandionugroho, Sp.Rad

Subsp.RI(K), with Harahap present in person to provide guidance.

This achievement reflects the academic quality of UPNVJ's Radiology Residents at the international level. This participation is expected to motivate the academic community to continue innovating in the development of Indonesian radiology.
