**0851-1755-5828**

Operator SubBagian Pengadaan Barang Jasa

**UPNVJ Public Relations** - Veteran National Development University Jakarta (UPNVJ) officially opened registration for Selected Providers for the 2026 Fiscal Year through the Selected Provider List Information System (SiDapet). Registration is open from April 1, 2026, at 8:00 a.m. WIB (Western Indonesian Time) to April 25, 2026, at 11:59 p.m. WIB. This step is part of UPNVJ's efforts to strengthen the governance of goods and services procurement to be more open, orderly, and digitally documented.

Through the online channel, UPNVJ opens various categories of provider registration, including internet network and telecommunication services, cooperative services, human resources services, Public Accounting Firm consulting services, *e-book*, *e-journal*, and textbook providers, publishing and printing services, office stationery, convection and *merchandise* services, media and advertising services, hotel services, *MICE* or *event organizer* services, laboratory equipment calibration services, laboratory equipment and medical equipment, software licensing, computers and multimedia systems, electronic equipment and household equipment, furniture and interiors, to construction services as well as construction planning and supervision services.

The entire registration process is conducted online through the UPNVJ SiDapet app. This channel serves as the primary gateway for prospective providers to view available packages, review requirements, upload qualification documents, and monitor the selection process. On the official website, UPNVJ also lists the UKPBJ procurement service contact details via email to assist with communication and administrative verification.

In general, the qualification documents requested for registration include company data, legal entity status, management structure, Business Identification Number (NIK) that corresponds to the business classification of the selected package, tax documents such as a valid NPWP (Taxpayer Identification Number), valid KSWP (Taxpayer Identification Number), and the most recent tax return (SPT), as well as technical support in the form of experts, facilities, equipment, and company financial reports. The details of the technical requirements vary depending on the nature of each procurement category, so prospective suppliers should carefully review the required documents for their selected package before submitting their files.

This registration opening underscores UPNVJ's commitment to providing an accountable procurement process while also opening up participation to competent providers relevant to the institution's needs. In line with strengthening the institution's performance in 2026, UPNVJ, under the leadership of Rector Prof. Dr. Anter Venus, MA, Comm, continues to promote a measurable and professional work system that supports quality campus services.

Interested business owners are encouraged to immediately prepare all required documents and complete their registration before the deadline listed on the active registration status on SiDapet. Document accuracy, business sector suitability, and data completeness are critical factors in the administrative selection and initial qualification process.
