

After graduating from the Data Science program, Ghaits shares his experience taking the UPNVJ prospective student health test.

Wednesday, 03 June 2026 14:54 WIB

UPNVJ Public Relations - Veteran National Development University Jakarta (UPNVJ) conducted a health check for prospective new students taking the 2026 UTBK-SNBT pathway at the Merce Building, UPNVJ Limo Campus, on Wednesday (June 3, 2026). This test is one of the mandatory steps for prospective new students who have passed the selection process before completing the registration process.

The health checkup proceeded smoothly and orderly, supported by medical personnel, doctors, and committee members who provided services and support to the participants. The examination was conducted in accordance with applicable regulations to ensure prospective new students' readiness for the UPNVJ learning process.

One of the participants, Ghaits Ghifari Izzatullah Mubarak from SMAN 2 Kuningan, who was declared to have passed the UPNVJ Data Science Study Program, expressed his gratitude and happiness after successfully passing the UTBK-SNBT selection.

"I feel very happy, even this feeling is difficult to describe in words after being declared to have passed the UPNVJ UTBK-SNBT, especially in the Data Science Study Program," said Ghaits.

He admitted he still couldn't believe he had reached this stage, given the notoriously competitive state university entrance selection process. Nevertheless, Ghaits was grateful that all the stages went smoothly.

"I still can't believe I've reached this point. However, I'm grateful that the entire process went smoothly," he added.

Regarding the implementation of the health tests, Ghaits also expressed his appreciation to all the healthcare workers and committee members on duty. He stated that the service provided was very helpful for participants during each stage of the examination.

"The health check I underwent also went well. All the staff and doctors provided clear explanations and provided friendly service, which was very helpful for us as participants," he said.
